PROFESSIONAL SUMMARY:

QA Automation Engineer with **4+ years of experience in Software Testing(QA)**, including strong expertise in both Manual and Automation Testing. Skilled in **Functional, Integration, Regression, API, Database, Performance and Security Testing using Selenium WebDriver (Java), Cypress, Cucumber BDD, TestNG, Rest Assured, and POM-based Hybrid/Data-Driven frameworks**. Experienced in CI/CD integration using Jenkins, version control with Git, and defect tracking using **JIRA** within Agile (Scrum) environments. **Proven experience in FinTech domain**, handling end-to-end automation of Personal Loan journeys and Digital Gold workflows, improving release stability and reducing manual regression effort by 60%.

TECHNICAL SKILLS:

- **Programming Languages:** Java, JavaScript
- **Testing Tools:** Selenium WebDriver, Cypress, Rest Assured, UI Testing
- **Test Frameworks:** TestNG, Cucumber BDD, Mocha
- **IDE:** Eclipse, Visual Studio Code, UI-Path
- **Databases:** MSSQL
- **CI/CD & DevOps:** Maven, Jenkins, Git
- **Methodologies:** Agile Scrum
- **Bug Tracking Tools:** JIRA

EDUCATION:

Bachelor of Computer Applications (BCA) – Vidya Vikas First Grade College, Mysore

---

PROFESSIONAL EXPERIENCE

Wortgage Finance Pvt Ltd (WeRize) – FinTech | Digital Lending

Software Engineer in Test (Sep 2025 – Feb 2026)
Technologies: Java, Selenium WebDriver, TestNG, Cypress, Rest Assured, SQL
Team Size: 12

- Designed and implemented Hybrid Automation Framework using Selenium WebDriver (Java) with TestNG and POM design pattern.
- Performed Functional, Sanity, Regression and Security Testing across lending workflows.
- Automated end-to-end Personal Loan journey (Login → Eligibility → KYC → Offer → Disbursement) and Digital Gold workflows.
- Automated 250+ UI regression test cases reducing manual effort by 60%.
- Developed REST API automation scripts validating response body, status codes, schema and database consistency using Rest Assured.

- Reduced regression cycle time by 40% through automation implementation.
- Collaborated with Developers and BAs for requirement refinement and defect resolution.

Mesame Infotech Pvt Ltd
Software Engineer in Test (Feb 2023 – July 2025)
Project: Consolidated Analytics Platform
Technologies: Java, Selenium WebDriver, TestNG, Rest Assured, API Testing
Team Size: 5

- Designed and implemented modular automation framework using TestNG and POM.
- Performed Functional, Regression and Compatibility Testing across multiple browsers.
- Automated REST API test cases for response validation and status verification.
- Conducted regression testing to validate stability after code changes.

Thinkbridge Software Pvt Ltd
Software Engineer (July 2022 – Jan 2023)
Project: Right Networks – Accounting & Tax Services
Technologies: Cucumber, Rest Assured, Azure, SQL, CI/CD Integration
Team Size: 14

- Automated third-party API integrations such as Microsoft 365 and Kaseya Security.
- Developed REST API test cases using Rest Assured and validated backend data using SQL.
- Participated in Agile ceremonies (Sprint Planning, Daily Stand-ups, Sprint Review).
- Reported and tracked defects using JIRA ensuring timely resolution.
- Provided Selenium automation training to manual testers.

BioQuest Solutions Pvt Ltd
Trainee Software Engineer (Nov 2021 – May 2022)
Project: Clinical Trial Management System (CTMS)
Technologies: Manual Testing, JIRA, SQL
Team Size: 4

- Analyzed Business Requirement Documents (BRD) and Functional Requirement Specifications (FRS).
- Prepared detailed test scenarios and executed Functional, Regression and Integration Testing.
- Executed SQL queries for backend data validation.
- Logged and tracked defects in JIRA and coordinated with developers for resolution.
